Professional Summary

Frontend Engineer with experience building 5+ web applications using React.js, TypeScript, JavaScript, Node.js, Raw SQL, PostgreSQL, and Tailwind CSS. Skilled in responsive UI development, REST API integration, Redux Toolkit, state management, secure JWT authentication, and performance optimization. Strong understanding of frontend architecture, accessibility, cross-browser compatibility, and Agile/Scrum practices.

Technical Skills

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, DaisyUI, Framer Motion
State & Data	REST API Integration, React Router, Context API, Redux Toolkit
Backend	Node.js, Express.js, RESTful API Development, JWT Authentication, Bcrypt, Role-Based Access Control (RBAC), Middleware Development
Database	PostgreSQL, MySQL, Raw SQL, Database Design
Tools & Dev	Git, GitHub, Vercel, Netlify, Firebase, Figma, Postman, Vite
Concepts	OOP, Data Structures, Algorithms, Responsive Design, Agile Development, Software Architecture
Programming	Python, Java, C, C++
Languages	Bangla (Native), English (Professional), Hindi (Basic)

Professional Experience

Front-End Developer Intern *July 2025 – Sept 2025*

Zensoft Lab, Dhaka, Bangladesh

- Delivered a production-ready modern school platform by developing fronted features and integrating REST APIs within a 2-member team.
- Built 20+ reusable React components using React.js and Tailwind CSS, ensuring responsive design, accessibility, and cross-browser compatibility.
- Converted Figma designs into pixel-perfect, responsive UI components, reducing revision cycles through close collaboration with designers and senior developers.
- Participated in code reviews, Git workflows, sprint planning, and Agile Scrum ceremonies to maintain code quality and delivery efficiency.

Projects

FixItNow – Your Trusted Home Service Platform [Live Demo] | [GitHub]

Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Stripe, Cloudinary

- Developed a full-stack marketplace connecting customers with verified technicians, featuring role-based dashboards and a complete booking lifecycle from request to payment to completion.
- Integrated Stripe for secure payment processing and designed a scalable PostgreSQL schema using Prisma ORM to manage users, services, bookings, and reviews.
- Designed a responsive, accessible UI with Tailwind CSS and shadcn/ui, featuring real-time analytics dashboards, dynamic filtering, and full dark/light mode support.

Dania College – School Management Website [Live Demo] | [GitHub]
React.js, Tailwind CSS, REST API, React Router, Framer Motion, React Slick

- Developed the complete frontend of a school management platform, integrating 25+ REST API endpoints and optimizing data fetching for improved performance.
- Built responsive navigation systems, theme switching (Light/Dark/System), and reusable UI components for a seamless user experience.
- Structured 20+ content modules including academics, admissions, student resources, galleries, and contact management.

Veltrio-Estates – Real Estate Web Application [Live Demo] | [GitHub]
React.js, Tailwind CSS, DaisyUI, Framer Motion, React Router

- Built a responsive property listing platform featuring detailed property pages and agent inquiry functionality.
- Implemented 6-parameter filtering and sorting to improve property search and browsing experience.
- Developed theme switching and mobile-friendly navigation for consistent cross-device usability.

Teste-IO – Restaurant Web Application [Live Demo] | [GitHub]
React.js, Firebase Auth, Tailwind CSS, EmailJS, React Slick, Framer Motion

- Integrated Firebase authentication with email/password, Google, and Facebook sign-in methods.
- Developed an automated reservation workflow with EmailJS for booking confirmation delivery.
- Built a dynamic multi-category restaurant menu with responsive UI and interactive user experience.

Education

Bachelor of Science in Computer Science and Engineering *Oct 2021 – Sept 2025*
Green University of Bangladesh
CGPA: 3.59 / 4.00

Higher Secondary Certificate (HSC) *Jul 2018 – Apr 2020*
Dania University College, Dhaka
GPA: 4.00 / 5.00

Research Work (Thesis)

Researched and implemented a TD3-based Deep Reinforcement Learning framework for service migration and task allocation in Edge Computing environments, focusing on delay minimization and energy efficiency *Sep 2024 – Aug 2025*
Green Computing and Communication Research Cell, Green University of Bangladesh

Training & Certification

Next Level AI-Driven Software Engineers (Batch-7) *May 2026 – Present*
Programming Hero

- Advanced full-stack training covering TypeScript, Next js. Node.js, Express.js, authentication, and authorization, PostgreSQL, Prisma, Docker, and AI integration etc.
- Building scalable backend systems, RESTful APIs, database architectures, and production-ready software with AI-assisted workflows.

Python with Django – 80 Hours *Nov 2024 – Feb 2025*

Institute of Information Technology (IIT), Jahangirnagar University — EDGE Programme, Bangladesh Computer Council

- Covered Python fundamentals through Django web framework, with a focus on backend development and REST API design.
